

The software that controls  
your logistic flows

### NaviTrans has one goal: make logistic service providers excel !

Every day we provide our customers with effective solutions that help them cut costs, increase profit margins and exceed customers' expectations.

NaviTrans Forwarding is a software solution, 100% designed for the forwarding industry. It has flexible configuration possibilities to easily adapt to the different flows that you need to handle for different customers.

With NaviTrans Forwarding you can:

- ✓ Get direct access to all relevant information from the single digital file.
- ✓ Communicate easily with all logistic stakeholders.
- ✓ Drive your business from the flexible business process management.
- ✓ Manage customer relations and interactions from within
- ✓ Combine costs from different service providers and create quotes quickly.
- ✓ Acquire end-to-end control over revenue and cost from offer to invoice.
- ✓ Get a complete accounting and finance solution.
- ✓ Maximize your cash resources.
- ✓ Make your own reports and distribute them to stakeholders.
- ✓ Gain insight into your business activities and spot trends.
- ✓ Capitalize on your knowledge and attract new opportunities.
- ✓ Manage the exception with nonconformities
- ✓ Expand into international markets.

*"We like that the system is open and allows us to build a communication with our main partners, both customers and vendors. At the same time the system is having strict processes that allow us to optimise our operations and automate some of the steps, making it much easier for our colleagues to work with and to save time."*

Svetlin Peshev, CEO, WTO, Bulgaria

NaviTrans Forwarding is part of the NaviTrans logistic suite that also contains software for Transport and Public Warehousing companies. It is developed on Microsoft Dynamics NAV, the business solution from Microsoft that structures financial and operational business processes.

Like other Microsoft products, NaviTrans is user friendly and easy to implement. It helps you overcome the challenges you face, control your business and stand out from the competition.

**Investing in NaviTrans is investing in your company's future.**

With 20 years of industry focus and 300 logistic service providers that rely on NaviTrans to control their businesses, NaviTrans has become the most comprehensive out-of-the-box solution in the logistic industry. It delivers an abundance of features and functions that enable not only your operational staff but also everyone else in your organization to optimize their daily activities:

- |                                     |                            |   |
|-------------------------------------|----------------------------|---|
| Personalized Screens                | Service levels             | Direct debits                           |
| Multi-language                      | EDI                        | Support for SEPA                        |

| Multi-depot distribution            | Consolidation              |   |
| Shipping schedules (Sailing tables) | Dimensions                 |   |
|                                     | Multi-currency             |   |
| Workflow management                 | XBRL                       |   |
| Dynamic task management             | Bank reconciliation        |   |
| Dynamic document management         | Cost accounting            |   |
| Instructions                        | Intercompany               |   |
| Qualifications                      | Cash management            |   |
|                                     | Bank account management    |   |
|                                     | Electronic payments        |   |

- ✓ 300 Logistic customers
- ✓ 7000 Users in 30 countries

- ✓ 20 Years branch experience
- ✓ 100% Industry focus

Certified for

## Microsoft Dynamics

NAV

NaviTrans is built on Microsoft Dynamics NAV technology. It's one of only few logistic industry solutions that has met Microsoft's highest standards and has acquired the "Certified for Microsoft Dynamics NAV" label.

The implementation of a new business software always imposes important changes with a serious impact on any organization. You can however reduce that impact by teaming up with NaviTrans, a software provider with knowledge of the logistic industry who delivers state-of-the-art technology and out-of-the-box functionality. A partner that stands for strong long-term partnership with clear commitments. A partner who has the experience to reduce your risk to a minimum and make your project a success.

**Become part of the growing community of top performing logistic companies that use NaviTrans to manage their business.**
