

The software that controls
your logistic flows

Every day we provide our customers with effective solutions that help them to cut costs, increase profit margins and exceed customers' expectations.

NaviTrans is a very complete software, built for the industry, designed for efficiency. Like other Microsoft products, NaviTrans is user friendly and easy to implement. It helps you overcome the challenges you face, control your business and stand out from the competition.

300 Logistic service providers rely on NaviTrans to control their business

More than 7.000 users work with NaviTrans on a daily base

3 integrated modules: Transport, Forwarding & Warehousing

Take control of your company and raise your profit

NaviTrans gives you the business insight to control your company processes and only manage the exceptions.

Thanks to the company-wide integration of the software, you can also be sure that all information you get is complete, correct and consistent.

The built-in intelligence and integrated warning systems help you to proactively respond to the rapidly changing realities of the market and take the right decisions to reduce costs and raise your profit margin, anywhere you are, on any device.

NaviTrans has one goal: make logistic service providers excel!

**1 company wide solution,
built for the industry,
designed for efficiency**

Increase productivity and keep your costs under control

NaviTrans translates the complex reality of transporters, forwarding companies and other logistic service providers into easy-to-control processes. The different modules work independently, but they also seamlessly integrate. A broad range of flexible configuration possibilities easily adapt to your business needs without tailoring.

The abundance of features enables everyone in your organization to optimize their daily activities. In an international environment, NaviTrans smoothly integrates local requirements and allows everybody to work in his/her own language and currency within the same central system.

Together, all the efficiencies provided enable you to realize significant growth figures without extra costs.

**Available in multiple
languages**

Bring customer satisfaction to a higher level

Growing competition, increasing expectations, decreasing customer loyalty... Making a living in the logistic industry can be a real struggle.

NaviTrans helps you to keep your customers happy. Flawless deliveries, correct invoicing, the ability to share valuable information rapidly and in real-time are only a few of the competitive advantages that allow you not only to increase customer satisfaction but also to attract new business. Thanks to the integrated automation tools, you can do all this with less effort from you or your staff.

**Installed in 30
countries worldwide**

**100% focus on the logistics
market since 1999**

NaviTrans, your guarantee for the future

When you select software to support your business critical processes, you want to have the guarantee that the solution you are going to implement not only supports your company today but also in the far future. NaviTrans offers a unique guarantee on 3 different levels:

We build a top class product

NaviTrans is developed on Microsoft Dynamics NAV, the business solution by Microsoft that structures financial and operational business processes. Many of the best practice processes of our 250 customers have been integrated. It is the most complete out-of-the-box standard solution for logistic service providers in the market. A dedicated team of developers builds new NaviTrans functionality on a daily base and guarantees the continuity of the product.

We closely follow trends in technology

Every year, Microsoft releases a new version of Dynamics NAV, containing both functional and technological improvements. NaviTrans closely follows this release schedule and with each new version, brand new features and functions are added that help you to save money and improve your service. With an annual investment of 11 billion US dollars on research and development, Microsoft guarantees the continuity of the technology.

We deliver top quality services

NaviTrans exclusively focuses on IT solutions for the logistics market since 1999. We understand your business and we have the industry experience, technological know-how and project skills to make your project a success. Your success is also our only option to maintain our reputation in the only market we're active in. This commitment to the industry guarantees the continuity of our services and your peace of mind. You don't have to worry about software, you can focus on realizing your company's ambitions.

Investing in NaviTrans is investing in your company's future.

The implementation of a new business software always imposes important changes with a serious impact on any organization. You can however reduce that impact by teaming up with NaviTrans, a software provider with knowledge of the logistic industry who delivers state-of-the-art technology and out-of-the-box functionality. A partner that stands for strong long-term partnership with clear commitments. A partner who has the experience to reduce your risk to a minimum and make your project a success.

Become part of the growing community of top performing logistic companies that use NaviTrans to manage their business.
