LOGISTICS SOFTWARE

Navitrans Logistics Software

Navitrans has one goal: make logistic service providers excel! Navitrans is a complete software, built for the industry, designed for logistic service providers who want to be ready for tomorrow's future.

With extensive and easy-to-use functions for road transportation, sea- and air- freight, intermodal transport and public warehousing, Navitrans is the most complete out-of-the-box logistic software in the market today. It helps you connect your business, take smart decisions, deliver your customers the service they expect and grow without worries.

Navitrans is being developed on Microsoft Dynamics 365 Business Central and is available on-premise or as a hosted solution. It consists of 3 main modules: Navitrans Transport, Navitrans Forwarding and Navitrans Warehousing. The three modules are designed to work independently; however, they also seamlessly integrate.

Microsoft Dynamics 365 Certified

- 300 Logistic customers
- 7000 Users in 30 countries
- 20 Years branch experience
- 100 % Industry focus

100% GUARANTEE

Deliver beyond expectations

In today's market, customers have increasing demands from their logistic service provider when it comes to flexibility, speed and transparency. With Navitrans, you have the ability to rapidly share valuable information with your customer in real-time. It offers you the tools you need to keep customers happy and attract new opportunities.

Connect your business

Navitrans is developed on Microsoft Dynamics 365 Business Central, the all-in-one business management solution (ERP). Business Central connects your logistic activities with finance-, sales- and other departments. With the Navitrans Driver App and on-board computer interface, you can control the activities on the road and the reliable Communication Frame connects your business with customers and other stakeholders in the supply chain.

Grow without worries

Navitrans includes multi-language and multicurrency capabilities and adapts to most local legislation requirements and location-specific practices for bookkeeping, reports, and financial statements. Consolidation functionality enables you to export transactions from subsidiaries and import them into the consolidated company. Built-in intelligence and alert systems provide insight in all your business activities and allow you to manage the exceptions only.

Take smart decisions

Collecting all operational and financial data in one system, in a complete, correct and consistent way, Navitrans helps you to proactively respond to rapidly changing realities in the markets you are active in. It also integrates smoothly with a growing number of other applications, such as Office 365, PowerBI, Flow and PowerApps. This way, Navitrans offers its users a total experience that no other logistic software can match.
