

Navitrans Warehousing

Growing competition, increasing customer expectations, highly fluctuating volumes... Trying to compete in the public warehousing industry is a real struggle. At Navitrans, we have made it our mission to help you overcome the challenges you face. Navitrans Warehousing is a warehouse management software (WMS) built for the industry, designed for logistic service providers who want to be ready for tomorrow's future.

With extensive and easy-to-use functions for logistic service providers that offer public warehousing services, Navitrans Warehousing is the foundation for your success. It helps you connect your business, take smart decisions, deliver your customers the service they expect and grow without worries.

Navitrans is being developed on Microsoft Dynamics 365 Business Central and is available on-premise or as a hosted solution. It consists of 3 main modules: Navitrans Transport, Navitrans Forwarding and Navitrans Warehousing. The three modules are designed to work independently; however, they also seamlessly integrate.

"Our aim is to guarantee lead times of 6 hours between order and delivery. This is quite an ambitious goal, one that can be achieved only with a modern WMS system."

Gert Snel, Snel Logistic Solutions, The Netherlands - Belgium

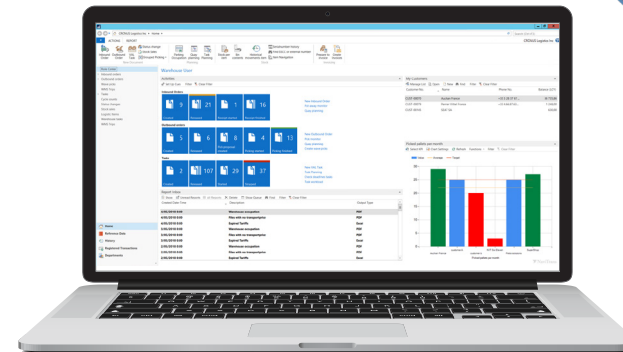

Navitrans Warehousing is a warehouse management software solution (WMS), 100% designed for logistic service providers that offer public warehousing services. It has flexible configuration possibilities in order to easily adapt the different flows that you need to handle for different customers.

With Navitrans Warehousing you can:

- Reduce labour costs of the warehouse workforce.
- Deliver the quality of service your customer expects.
- Offer full inventory visibility and track & trace.
- Deliver no-nonsense Value-Added Logistic services
- Manage customer relations and interactions from within
- Adapt to variable customer agreements.
- Get a complete accounting and finance solution.
- Maximize your cash resources.
- Make your own reports and distribute them to stakeholders.
- Gain insight into your business activities and spot trends.
- Capitalize on your knowledge and attract new opportunities.
- Manage the exception with nonconformities
- Expand into international markets.

- 300 Logistic customers
- 7000 Users in 30 countries
- 20 Years branch experience
- 100 % Industry focus

Navitrans is developed on Dynamics 365 Business Central, the all-in-one business management solution (ERP) from Microsoft that is user friendly and easy to implement. It is one of only few logistic industry solutions that has met Microsoft's highest standards and has acquired the "Certified for Microsoft Dynamics 365" label.

Become part of the growing community of top performing logistic companies that use NaviTrans to manage their business.
